

For better weaving.

Improving your fabric quality: Steel Heddle® Super Polish heddles

For better weaving ...

Increasing weaving efficiency & cost controlling are most important. Especially in these times. It requires from the weaving conscientious quality & production supervision.

Even for weavers of delicate and fine filament fabrics, the strive for highest quality standards remains. Needless to say, delicate warp yarns (such as silk, acetate, fine filament yarns, ...) require ultimate care.

Our innovation ... your benefit

The Steel Heddle® Super Polish heddle offers highest care for any delicate warp yarn. Thanks to 80% longer polishing time with special finishing methods, the Steel Heddle® Super Polish heddle comes with an ultimate smooth heddle surface finish.

In turn, delicate warp yarns are glided most gently along the heddle; with minimal friction. Resulting in the best fabric quality, meter after meter. Guaranteeing highest weaving performance.

Performance-proven solution

With many references at delicate & fine fabric weavers world-wide, the Steel Heddle® Super Polish heddle is the most suitable heddle for improving the quality of your delicate fabrics.

GTP experts will gladly provide you with any further information on our specialty heddles. You can contact us at sales@globaltextilepartner.com.

GTP ... the true Textile Partner

GTP is leader in high-class weaving accessories. With strong development capabilities, we offer real weaving solutions for achieving the best weaving performance possible on your loom.

Steel Heddle®
Super Polish Heddles

Highest care
for your warp yarn

New: RPF500

Cost-effective rapier frame

RPF500

Your benefits

- Cost-effective
- Available for C- and J-shaped heddles
- Up to 240 cm

GTP, world leader in the design of most reliable weaving accessories, introduces a new frame for the rapier weaving machines. With current market situations there is a growing need for cost-effective solutions. Therefore, GTP searched for a reliable cost-effective frame that suits the standard requirements of rapier weaving machines.

The RPF500 is GTP's new cost-effective rapier frame. It is a standard harness frame with a high-strength 120 x 9 mm aluminum profile. The RPF500 design allows both S-connectors and DRC1 driving elements on the frame profile.

This makes the RPF500 a versatile harness frame compatible with most of today's lower speed rapier looms at weaving speeds of maximum 500 rpm. The RPF500 is available in both C- and J-shaped heddle execution and for loom widths up to 240 cm.

In addition, the RPF500 frame can be used with any type of automatic drawing-in machine.

GTP ... the true Textile Partner

With over 110 years of expertise in delivering reliable weaving accessories, and more than 2000 valued customers around the globe, GTP knows how to get the best performance out of your loom in a cost-efficient manner. GTP maintains sales & service offices in the biggest textile markets worldwide.

Our GTP specialists will be pleased to offer solutions for your challenges in weaving. Your nearest GTP representative can be found on www.globaltextilepartner.com or you can contact us on sales@globaltextilepartner.com for further information.
