

## Press Release

15 08 2008

### Visitors of ITMA 2008 celebrate with the GTP-team !

Since 1898, Steel Heddle® has always strived to improve the performance of its weaving accessories. This has made GTP - Steel Heddle the largest and most experienced heddle manufacturer in America and one of the largest in the world.

ITMA Asia – CITME 2008 attracted many visitors and Steel Heddle demonstrated its high-quality range of heddles. On display were specialty heddles like interlaced leno heddles made from tempered steel and the Jet-Eye® heddles that allow for the best yarn passage with lowest friction, even at the highest weaving densities. Also displayed were harness frames for all available loom types, featuring patented or exclusive characteristics such as flexible corner connection, glued heddle rod and integrated heddle damping system for outstanding weaving performance.

While visitors showed great interest in these leading weaving accessories during ITMS Asia – CITME 2008 they also celebrated with GTP the 110<sup>th</sup> anniversary of GTP-Steel Heddle. Visitors were invited to participate in a unique contest to win 110,000 Steel Heddle® heddles. The lucky winner was Chinese visitor HuaMao (Xiamen) Weaving, Dyeing & Finishing Co., Ltd.

Steel Heddle® and GTP Global Textile Partner are proud of its 110 years of experience and vast leadership in producing quality heddles, as well as other reliable weaving accessories.
