

Press Release
20 04 2008

**GTP Global Textile Partner
at Techtextil Frankfurt 2009 (Germany)
16-18 June
Hall 3.0 Booth J47**

“Weaving with full confidence, growing into the future”

Today, weavers can no longer neglect the importance of using most reliable & innovative accessories which will strengthen production efficiency and fabric quality. Your mill needs a solid partner who pays utmost attention to qualitative materials, unique designs and innovative features.

With more than a century of experience in designing & innovating weaving accessories, GTP Global Textile Partner, delivers what you need: consistent high-quality and **performance-proven solutions for technical textiles** including leno, glass, filter and narrow fabrics.

A solid guarantee to weave with full confidence, meter after meter. With GTP you are always ready for the future. Visit GTP during Techtextil Frankfurt and discover the newest innovations in weaving accessories. At main display will be the specialty heddles including **leno heddles** and our **JET EYE®** for minimal yarn friction. As well as the **high-speed HybridPower 158 frame with carbon fiber**, highly known and valued in the world of technical textiles weavers for its highest performance. GTP also introduces at this exhibition its new cost-effective RPF500 frame.

STEEL HEDDLE

-  Heddles
-  Frames
-  Drop wires

Frames for high-level performance:

- HybridPower 158 : the high-speed frame with carbon reinforcement, allowing to weave also without center support on frames up to over 400 meter
- Sulzer Projectile frames with extra rigidity in combination with the best Steel Heddle LENO system
- NEW: the cost-effective rapier frame RPF500; the economical frame for standard rapier frames
- XLF152 frame with integrated heddle damper (patented) for lowest heddle vibration
- AluPower 124 frame for standard applications on both air & rapier machines with the unique flexible corner connection (R-flex)

Heddles of consistent high-quality:

- Jet-Eye heddle for lowest friction of the warp yarn in the heddle eye
- Exclusive tempered leno heddle for longest life time at highest speeds, especially for technical weaving applications.
- Thinnest 0,20 mm heddle for mesh screen weavers or delicate fabrics
- Ni-plated heddles, our specialty product for silk weavers
- Flat steel Heddles from Simplex – Duplex with any eye size, in any length for any application
- Narrow fabric heddles including hard chrome plating for ribbon weaving

Drop wires for any application:

- From INOX to zinc plated, suitable for any automatic drawing-in machine

Reeds ... even for the glass industry:

- High-precision airjet reeds
- Special wear resistant reeds for glass weaving applications

Latest nozzles generation:

- Both ECO & POWER nozzles for any loom type available, ensuring energy savings and higher weaving speeds
